

## Frontend inspirations

All Recipes: I like this website because of the search function and menu bar allocated at the top to allow users to click on what they are looking for.  
<https://www.allrecipes.com/>

Epicurious: I like the way their layout is set up with the menu bar by the title and sign on bar at the top right of the page with the menu items below.  
<https://www.epicurious.com/>

Simply: I like this site as this site has a great layout

<https://www.simplyrecipes.com/>

The screenshot shows the homepage of simplyrecipes.com. At the top, there's a navigation bar with links for RECIPES, QUICK & EASY, IN THE KITCHEN, TABLE TALK, HOLIDAYS & SEASONS, and ABOUT US. Below the navigation is a large banner featuring a close-up image of macaroni and cheese. A central callout box on the left says "The 20 Best Mac and Cheese Recipes Ever". To the right, there's a section with the text "Less stress & MORE JOY since 2003", "Helping 15 Million home cooks a month", and "Over 3,000 tested and proven recipes". Further down, there are sections for "The Latest" (with images of salmon and chicken), "RECIPE COLLECTIONS" (14 Easy Baked Salmon Recipes), and "VOICES" (My 3-Ingredient Mediterranean Marinade Is the Secret to Better Chicken). The bottom of the page features a footer with social media icons and a colorful Mac OS-style dock at the very bottom.
